

Sirs:I am writing about the NAB attempts to muzzle or limit the content of satellite radio. I have been a satellite radio subscriber for about a month now and I feel that it is the greatest innovation in radio in a long time. I do not mind paying a monthly charge for superior programing and commercial-free music available all over the U.S.

I find the local traffic reports and localized weather a valuable service as I drive around the country.

I want the market place to determine what I listen to, not the NAB or other commercial interests. Satellite radio is currently providing a more superior service than the traditional AM/FM stations and it should be left alone to grow and blossom. I urge the FCC to reject the NAB petition #04-160.
